

Finance Manager (m/f)

Become part of a team that changes the engineering landscape and strives to build a safer world by challenging conventional thinking and delivering customer focused solutions.

Vibrationmaster manufactures technology leading material test solutions to analyse the integrity of bolted joints. Our patented technologies are brought to use daily throughout the world by leading OEM's such as ABB, Boeing Inc, Toyota and SpaceX.

To support our management team, we are searching for a Finance Manager (m/f).

Your responsibilities:

- Formulate a strategic and long-term financial plan
- Prepare and manage budget
- Prepare our day-to-day financial accounting and reporting
- Liaising with auditors to ensure annual audit is carried out
- Develop and maintain relationships with auditors, bankers and statutory organisations
- Arrange new sources of finance for working capital and long-term expansion
- Investigate ways to improve profitability, and analyse markets for business opportunities, such as expansion, mergers or acquisitions
- Contribute to the development of our ERP system and process controls
- Prepare customer documents such as order confirmations, invoices, account statements

Your qualifications:

- Financial accounting training coupled with a Master of Business Administration or similar
- Minimum 10 years of relevant experience within the B2B industrial sector
- Professional and team-oriented approach, complimented by exceptional administrative skills
- Fluent in English and a second language such as German or Luxembourgish
- Are disciplined in your work processes and keen on delivering highest possible quality
- Are inspired by an entrepreneurial culture.

Vibrationmaster offers a challenging future and a competitive remuneration based on a fixed salary and possibility to join our Employee Stock Option Plan. The full-time employment position is available immediately. Please send your application and CV in English to Morten Schiff, CEO, on ms@vibrationmaster.com.
